

G00 - B15

Sensor with EMI probe

Applications

The G00-B15 sensor will allow you to perform an EMI pre-test and debugging in order to efficiently locate the EMI source and resolve EMC problems. The users will be able to find solutions to modify the faulty products.

Specifications

Detector	Spectrum analyser (Zero Span Mode)
Unit	Spectrum analyser Unit (saved inside the application)
Sensitivity	Depends on the setting of the analyser (saved inside the application)
Diameter of the loop	15 mm

Example
