

**LOT TRACEABILITY CONTROL- SERIAL NUMBER OR
DATE CODE**

The material supplied on this purchase order is under Lot Traceability Control at Raytheon. The drawing will specify the Lot Traceability Control method by requiring a Serial Number or Date Code. Material provided in accordance with this Purchase Order shall meet the following requirements.

1. Each shipment shall be from only one Original Equipment Manufacturer (OEM).
 - 1.1. For Serialized Lot Control: Serial numbers shall have an 8 character maximum.
 - 1.2. For Date Code Control: each container within a shipment shall be marked with a single numeric date code and quantity. Individual Date Codes must be segregated within the shipment. Mixing date codes within the same unit and intermediate package is not allowed.
2. Components which are too small to have the date code or serialization marked on them shall have the unit package or intermediate package identified with the appropriate date code marking.
3. A Lot Traceability Control Sheet (see note below) shall be submitted with each shipment

This document is an integral part of the contract (purchase order), which calls it out. The revision in effect at the time the purchase order was placed applies.
