

| 12 | WALL MOUNTING BRACKETS

innco systems Wall Mounting Brackets are 100 % metal free and especially designed for EMC absorber chambers.

The stable structure is able to carry the camera and audio systems at the chamber wall.

Different bracket-lengths are available to place the camera in front of the installed wall-absorbers.

Several adapter mounting plates for different camera and audio systems are available on request.

The installation could be done directly by screws on the wall or by clamps on the rail system of the chamber.
