

HT0806-805

Technical Data

Material:

- | | |
|-------------|------------|
| • Structure | PVC |
| • Table Top | Kömacell |
| • Spindle | Fiberglass |

Dimensions:

- | | |
|------------------------------|------------------------------------|
| • Height manually adjustable | 500...805 mm (height of Table Top) |
| • Table Top | 800 mm x 600 mm |

Load capability	15 kg
-----------------	-------

Brief description

The HT0806-805 Test Table is specifically designed for measurements with a Monopol rod-Antenna, which could be fixed by 1/4-20 UNC Screw on the Table top.

The Table height could be adjusted manually by Hand Crank or using cordless electric Screwdriver. An installed scale indicates the actual Table height.

The extendable support for the additional ground plate supports a groundplane up to 1300mm length (incl. Monopol Antennas Plate)
