

Datasheet

Field of application and characteristics

The **BV-12S** can be used as mobile power supply for equipment in the emc laboratory.

The internal NiMH battery pack makes the system mobile and easy to use.

Technical data

Output voltage:	+12V unregulated (10 cells NiMH)
Output current:	max. 1A (internal fuse)
Output connector:	4mm banana plug
Power supply:	10 NiMH cells with 4 Ah (12V)
Case dimensions:	100mm x 100mm x 105mm aluminum case with rubber protectors
Weight:	approx. 1500g
Misc.:	volt meter to display output voltage 100mA test load for integrated batteries
