

Datasheet

Field of application and characteristics

The **BV24/15S** can be used as mobile power supply for equipment in the emc laboratory.

The internal lead acid battery pack makes the system mobile and easy to use.

Technical data

Output voltage:	+24V unregulated (2x 12V Pb)
Output current:	max. 3A (short term 6A, internal fuse!)
Output connector:	4mm banana plug
Power supply:	2x 12V Pb, 15Ah
Case dimensions:	200mm x 120mm x 150mm aluminum case with rubber protectors
Weight:	approx. 11kg
Misc.:	volt meter to display output voltage 100mA test impedance for integrated batteries
